EDUCATION

Columbia University, New York, NY

September 2025 – December 2026

Master of Science in Applied Analytics (STEM Designated – Computer & Information Sciences)

- *Courses*: Fundamentals of Data Engineering, Applied Machine Learning, Data Modeling, SQL & Relational Database
- *GPA*: 4.04/4.0

Boston University, Boston, MA

September 2020 – May 2024

Bachelor of Science in Business Administration

- *Dual Concentration*: Information Systems & Business Analytics - *Minor*: Economics

RELEVANT PROJECTS

Credit Card Spend Prediction – Machine Learning Competition (Python)

@ Columbia University

- Ranked Top 2% (7th out of 354 participants) for building high-performing predictive models using demographic, behavioral, and transaction data to estimate monthly credit card spend
- Developed and optimized multiple ML models, including Linear/Lasso/Ridge Regression, kNN, Decision Trees, Random Forest, Bagging, and Boosting—using cross-validation to minimize RMSE and produce leaderboard-ready predictions
- Performed data cleaning and feature engineering including PCA, variance thresholding, stepwise selection, etc.

Cross-Store Sales & Inventory Analytics (SQL, Python)

@ Columbia University

- Created a centralized PostgreSQL data model for five New York retail locations, normalizing 16 tables to 3NF and loading 6,300+ records through a Python-based ETL workflow
- Analyzed sales and operations data with 10+ SQL queries incorporating CTEs and window functions, then built Metabase visualizations to track revenue trends, inventory shortages, and store-level performance

Uber One Membership Churn & Retention Analysis (Tableau, Excel)

@ Columbia University

- Cleaned and analyzed 645-member subscription and transaction datasets in Excel; segmented users by recency, frequency, product usage, demographics, and revenue to identify churn drivers and at-risk customer groups
- Built interactive Tableau dashboards with cohort drop-off, churn segmentation, geographic, and revenue analyses; identified a 65.8% churn rate among Uber Eats-only users and flagged high-value members with declining engagement
- Translated churn insights into targeted retention actions

PROFESSIONAL EXPERIENCE

Foxconn Technology Group (also known as Hon Hai Precision Industry)

July 2025 – August 2025

Corporate Summer Intern

- Built and applied quantitative risk assessment matrices to evaluate Foxconn's supply chain vulnerabilities, trade tariffs, and regulatory risk exposure as a technology leader
- Analyzed large-scale public opinion data to detect sentiment trends in the global technology/semiconductor industry and synthesized findings into corporate strategy recommendations
- Supported investor relations by analyzing financial and operational metrics, benchmarking peer performance, and preparing insights for executive communications

Standard Chartered Bank

June 2023 – August 2023

Summer Analyst - Corporate & Investment Banking

- Composed risk management reports for listed corporate clients through in-depth analyses of loan applicants' credit data, financial statements, and industry reports to evaluate potential risks and mitigations
- Collaborated with relationship managers to prepare up to 20 client scorecards/credit ratings for the credit approval processes
- Designed a data-driven dashboard integrating client CSR information, identifying up to 10 business opportunities in sustainable finance while collaborating with the bank's global teams

Uber Technologies, Inc.

June 2022 – August 2022

Project Intern – Uber Eats

- Facilitated UberEats Anti-Money Laundering Verification project processing and validating clients' faulty financial documents and resolving documentation issues
- Handled over 65 cases daily and secured approximately 15 million NTD (500,000 USD) for the corporation
- Selected as a team leader and guided the team's enhanced performances by developing specific KPI reports and statistical analyses to track team efficiency, improving case resolution workflows by 30%

SKILLS

Technical: Python, SQL, Tableau, MongoDB, PySpark, Flask, Neo4j, Scrum (Professional Scrum Master I), Salesforce, Excel

Language: Mandarin (Fluent), English (Fluent – TOEFL: 120/120 – Perfect Score), Spanish (Conversational)

Core Competencies: Data Analysis, Information Science, Business Analytics, Database Design, Project & Product Management
